

Carry The Torch

Transforming Organizations & Empowering People

"Leaders can find relief in their teams if they only look. Strengthen the positive, weaken the negative." - **Pegine Echevarria**

Brief Summary

It is our internal desire to impact the community, organizations and the people we interact with while leading them to positive outcomes.

For some they understand the desire to mean control.

For others they understand the desire as being too lofty an ideal, something they are not worthy of.

Still for others they want to follow that desire to lead but don't know how.

In this program Pegine leads participants on an interactive and entertaining journey of what true leadership is. She shares how true leadership is embodied in three torch symbols.

The torch of the Statue of Liberty - offering hope and opportunity.

The torch of the Olympics - offering global diversity, competition and camaraderie.

The torch of the firefighter - offering images of searching, risk taking and brotherhood of man.

Selected Points

- What are TORCH behaviors and beliefs and how can you incorporate them in your life?
- How to motivate, encourage and support your team
- How to be a TORCH leader in today's environment
- How to lead the TORCH way at work and at home
- How to acknowledge people effectively and create a team environment.
- How do TORCH leaders behave and how you can be one of them.

Participants will:

- Learn several techniques to improve their leadership ability.
- Enjoy themselves and be entertained.
- Interact with their co-workers and fellow audience members while discussing, laughing and participating in activities.
- Build stronger teams using TORCH principles.
- Learn TORCH principles of leadership and how they can incorporate them at work and at home.
- Increase their knowledge about why some leadership techniques don't work and how they can incorporate simple but effective strategies in their leadership skill box.
- Learn how to acknowledge, motivate and prod their teams to higher productivity and increased bonding among members.
